Autumn Planting

2.13 Experienced planters agree that **AUTUMN** is the best season for planting **HARDY TREES** and other **HARDY PLANTS**. The newly-planted stock has ample opportunity to re-establish its root system before winter weather and is ready the following spring to start into vigorous growth. Then again it is the season of fewer garden demands and one has more time to attend to the planting.

HOW TO PLANT

A VALUABLE PAMPHLET OF GENERAL INFORMATION SENT ON REQUEST

What to Plant in the Autumn (from Sept. 1st)

- EVERGREENS** Our extensive stock of Choice Evergreens covers many acres and comprises the desirable varieties of Spruce, Pine, Yew, Cypress, Arborvitae, etc., assembled from every country.
- SHADE TREES** For avenues and general landscape planting, one's taste would be hard to please if they cannot find what they require from among our blocks of Maples, Oaks, Elms, Willows, Lindens, Birches, Poplars, etc.
- SHRUBS** The universal usefulness and beauty of the many kinds of Flowering Shrubs is now generally recognized. Our stock is so extensive and varied that one can obtain about every useful kind and in almost any quantity.
- VINES** A garden effect can only reach its highest beauty when the free use of Hardy Vines is availed of. Their festooning habit of growth, beautiful foliage and bloom, lends a grace and beauty many times where otherwise unsightly objects would obtrude.
- HERBACEOUS PLANTS** Plants with hardy roots whose tops are renewed annually come under the head of Hardy Herbaceous Plants and include many of the garden's most interesting flowers. Paeonies, Iris, Phlox, Larkspur, etc., are popular examples. We carry an immense stock of these interesting plants in the newer and standard varieties.
- ROSES** The greatest variety of the Choicest Garden Roses are grown at the Nursery. Several acres of lustrous plants will another season be one of the show features of our new Woodmont Nurseries. Our stock which we now offer for sale is all strong field-grown and can be depended upon to give immediate results.
- HEDGES** The popularity of hedges is now almost universal. We grow the Privets, Barberries, etc., in enormous quantities and offer them at very popular prices.
- FRUITS** No home garden is complete without at least a few choice Fruit Trees, Vines and Berry Plants. The many large and flourishing orchards throughout New England are very good proof of the commercial side of fruit-growing as a well-established industry. Our stock is extensive and in many sorts we can supply fruiting sizes, which are time-savers to those who are in a hurry for results. **POT-GROWN STRAWBERRY PLANTS** planted now will produce a full crop another season. *Send for special list.*

IF IT IS HARDY AND WORTH HAVING, WE PROBABLY HAVE IT
LARGE SPECIMENS FOR THOSE WHO DESIRE EARLY RESULTS
COMPLETE CATALOG ON REQUEST

Landscape Department

The Elm City Nursery Company

WOODMONT NURSERIES, Inc.

SALES NURSERIES AND OFFICE **EDGEWOOD** NEAR NEW YALE BOWL

New Haven, Connecticut

Our extensive business, which is rapidly growing to larger proportions, is the logical result of the organization's close application to the many details of a complicated business. We are thereby able to produce and furnish the many Trees and other Stock the purchasing public now so largely require in the creating of greater beauty and usefulness everywhere out-of-doors.

Our new Nurseries which are being rapidly established at Woodmont-at-the-Station, will within a few years be a veritable mecca for those who love the choicest of nature's beauties as expressed in trees and plants.

For the ensuing two years our nursery business will be conducted as formerly at our present office at Edgewood, which is easily reached by transfer from all trolley lines and direct from the railroad station by the Edgewood line. Auto from city via Chapel Street.
